Summary

Full-Stack Developer experienced in building AI-powered web applications using Next.js, React.js, Node.js, Express.js, and MongoDB. Proficient in integrating LLM APIs, authentication, workflow automation, payment gateways, and cloud technologies to deliver secure and scalable solutions.

Projects

WorkLance | **AI-Powered Job Hunt Platform** | *React.js, Node.js, Express.js, MongoDB, Git* **November 2026**

- Developed a full-stack AI-powered freelancing platform connecting clients and freelancers with secure authentication and job management.
- Developed RESTful APIs using Node.js and Express.js for authentication, user profiles, jobs, applications, and messaging.
- Integrated JWT Authentication with secure password hashing and protected routes.
- Implemented Cloudinary for profile image and portfolio uploads.
- Designed role-based dashboards for Admin, Client, and Freelancer.
- Developed features like job posting, job applications, freelancer profiles, portfolio management, and application tracking.

ExpenseX | **AI-Finance-Management** | *Next.js, React.js, Node.js, Express.js, MongoDB* **July 2027**

- Developed a full-stack AI-powered personal finance management platform enabling users to securely manage income, expenses, budgets, and financial transactions through an interactive analytics dashboard.
- Implemented AI-powered receipt scanning, automatic transaction categorization, personalized financial insights, spending analysis, and intelligent saving recommendations using LLM-based APIs. AI is increasingly used in finance for personalized insights, automation, and forecasting.
- Built secure authentication with Clerk, supporting Google Sign-In, email/password login, email verification, password recovery, and protected user sessions.
- Integrated Razorpay/Cashfree payment gateway for premium subscriptions and online payments, with complete transaction history and payment tracking.
- Strengthened application security using Arcjet for bot protection, API security, rate limiting, and abuse prevention while storing financial data securely in MongoDB.
- Designed responsive dashboards featuring expense trends, category-wise analytics, budget monitoring, recent transactions, and AI-generated financial health recommendations to improve money management.

Technical Skills

Languages: C/C++, Python, JavaScript, TypeScript, HTML/CSS, LaTeX
Technologies/Frameworks: Next.js, React.js, Node.js, Express.js, shadcn/ui, Tailwind CSS
Databases: MySQL, MongoDB, PostgreSQL
AI Technologies: OpenAI API, Gemini API, Prompt Engineering, LangChain, Retrieval-Augmented Generation (RAG)
Developer Tools: AWS, Git, GitHub, CI/CD, VS Code, Clerk, Inngest, Arcjet, Google Cloud Platform (GCP), Claude Code, Postman, Jira
Courseworks: OOPs, DBMS, Operating Systems, Computer Networks, Compiler Design, System Design

Leadership / Extracurricular

Ameya Esport Club **2024 – 2027**
General Secretary *SVVV*

- Led technical and backend coordination for club events and internal systems.
- Managed team operations and spearheaded decision-making across cross-functional responsibilities.
- Oversaw end-to-end event planning, digital coordination, and execution strategies for large-scale esports events.

Education

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore (SVVV) **2023 – 2027**
Bachelor of Technology in Computer Science *Indore, Madhya Pradesh*

Chameli Devi Public School
CBSE Class XII — 2023 *Indore, Madhya Pradesh*
