Summary

Full-Stack Developer with experience building scalable web applications using React.js, Next.js, Node.js, Express.js, and MongoDB, with a strong focus on backend engineering, cloud deployment, and DevOps. Experienced in developing RESTful APIs, authentication systems, payment integrations, and AI-powered features, with hands-on knowledge in Docker, AWS ECR, AWS ECS, and CI/CD workflows.

Projects

WorkLance | **AI-Powered Job Hunt Platform** | *React.js, Node.js, Express.js, MongoDB, Git* **june 2025**

- Developed a full-stack freelancing platform connecting clients and freelancers with secure authentication and end-to-end job management.
- Built RESTful APIs using Node.js and Express.js for authentication, user profiles, jobs, applications, and messaging.
- Implemented JWT authentication with secure password hashing, protected routes, and role-based access control.
- Integrated Cloudinary for secure profile image and portfolio uploads.
- Designed role-based dashboards for Client and Freelancer with access-controlled workflows.

PrepFlow | **AI-Powered Learning Platform** | *React.js, Node.js, Express.js, MongoDB, Mistral AI* **september 2026**

- Developed a full-stack learning platform for students to access study materials, take mock tests, track progress, and review performance.
- Implemented Clerk-based authentication and role-based access for Admin, Teacher, and Student users.
- Built an Admin dashboard to upload notes/PDFs, add video lessons, create mock tests, manage questions, and manage students and teachers.
- Developed RESTful APIs using Node.js and Express.js with MongoDB for managing users, learning content, tests, questions, and results.
- Integrated an LLM-powered AI assistant using Mistral AI and LangChain, with Tavily for web-based information retrieval and contextual student assistance.

User Editor | **Real-Time Cloud Application** | *Docker, AWS ECR, AWS ECS, AWS ALB* **August 2026**

- Developed and containerized a web-based user editor using Docker for consistent cloud deployment.
- Containerized the application using Docker and managed container images through Amazon Elastic Container Registry (ECR) and deployed the application on Amazon ECS
- Configured an AWS Application Load Balancer (ALB) to route incoming HTTP requests to the deployed ECS service.
- Deployed the application using Docker and AWS for scalable cloud delivery.

Technical Skills

Languages: C/C++, Python, JavaScript, HTML/CSS
Technologies/Frameworks: Next.js, React.js, Node.js, Express.js, shadcn/ui, Tailwind CSS
Databases: MongoDB, MySQL
Cloud & DevOps: AWS, AWS ECR, AWS ECS, Docker, CI/CD
AI & GenAI: LLMs, Generative AI, Agentic AI, Prompt Engineering, LangChain
Tools & Platforms: VS Code, Git/GitHub, Clerk, Cloudinary, Razorpay, Google Cloud Platform (GCP), Claude Code, Antigravity, Postman, Jira
Coursework: OOP, DBMS, Operating Systems, System Design

Leadership / Extracurricular

Ameya Esport Club **2024 – 2027**
General Secretary *SVVV*

- Led technical and backend coordination for club events and internal digital systems.
- Managed team operations, delegated responsibilities, and coordinated cross-functional activities.
- Oversaw end-to-end planning, digital coordination, and execution of large-scale esports events.

Education

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore (SVVV) **2023 – 2027**
Bachelor of Technology in Computer Science *Indore, Madhya Pradesh*

Chameli Devi Public School
CBSE Class XII — 2023 *Indore, Madhya Pradesh*
